

Clinical Formulary Updates

To help ensure that you receive the highest quality, most affordable care, we routinely assess new and existing drugs to determine their safety and effectiveness.

This list is meant to supplement our Clinical Formulary, which is updated twice a year. For a comprehensive list of drugs, please refer to the Clinical Formulary.

The following drugs are new or their formulary status has recently changed. This list is intended to keep you up-to-date and help you select the most medically appropriate and affordable therapy.
